## **UK Manufactured Patient Lifting and transfer products.**

A range of high quality patient lifting slings and textile moving and handling products proudly manufactured in Washington, England.

With over 20 years of manufacturing experience there's nothing we can't do.

We manufacture our own range of products or to customer specifications. If you have a style of sling or product we can produce those also with your own colours and sizing.

All enquiries are welcome.

### **RM0300 Universal**

The RM0300 Universal sling offers great support, comfort and upright seating position due to the pelvic support straps.

Other standard features are longer padded legs and slide sheet material on legs to reduce friction with a rear pocket for positioning the of the sling when applying.

### **RM0400 Universal Deluxe**

The RM0400 Universal Deluxe with head support offers great comfort and support. The scoop shape increases support around the shoulders and the head support is useful for transferring from lying positions or if the user needs to be reclined.

Other standard features are longer padded legs and slide sheet material on legs to reduce friction with a rear pocket for positioning the of the sling when applying.

### **RM0500 Toilet**

The RM0500 Toilet sling has been designed to help facilitate with the toileting process. Easy to fit with good access allowing for the removal of clothing.

This sling is fully padded with an adjustable Velcro body belt it also benefits from wide legs with slide sheet material on legs to reduce friction and ease fitting.

	<b>SIZES</b>
<b>Paediatric</b>	<b>1 2 3 4 5</b>
<b>Adult</b>	<b>X Small Small Medium Large</b>
	<b>X Large XX Large</b>

**RM0501 Toilet**

The RM0501 is like the RM0500 but without the body belt.

Whilst still lifting from under the arms the cross over straps are designed to grip the user comfortably creating a more secure experience. The tension of the cross over straps increases when lifting reduces the user sliding down that may occur with standard toilet slings.

**RM0502 Toilet**

The RM0502 is the same as the RM0501 with additional head support which is adjustable for comfort.

**RM0503 Toilet High Back**

The RM0503 uses a higher back to a standard toilet sling and is normally used when the user cannot tolerate being hoisted with the sling under their arms. The legs are slightly wider to increase comfort along with full body padding. This sling uses cross over straps which are designed to grip the user.

The tension of the cross over straps increases when lifting reduces the user sliding down that may occur with standard toilet slings.

**MATERIALS**

**POLY**

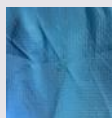

400kg SWL

**MESH**

300kg SWL

**PARA**

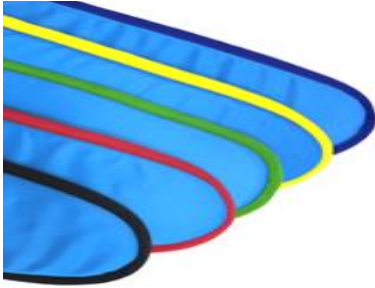

200kg SWL

**SPACER**

300kg SWL

## MATERIALS

### Poly 400kg

A standard material that is easy to apply with smooth finish and 400kg safe working load.

### Mesh 300kg

Used for bathing and wet areas with a 300kg safe working load.

### Spacer 300kg

A 3D elasticated material that provides more pressure care over standard materials with a 300kg safe working load.

### Parachute 200kg

A soft silky material that is easier to apply and remove with a 200kg safe working load

### RM0600 Hammock

The RM0600 Hammock/Amputee sling is designed to provide full body support to the neck, back and shoulders.

This model is available with or without a commode aperture and is fitted from a lying position.

### RM0700 In Chair Hammock Pommel

The RM0700 In Chair Hammock with pommel is a fully supportive sling that is manufactured from 3D Spacer fabric.

The Spacer fabric is used to replace traditional padding for additional comfort by reducing heat by allowing air to circulate.

This sling is used in situations where the sling cannot be easily removed and therefor may need to stay in place. for longer periods. This sling is available with head support and extensor straps.

### RM0701 In Chair Hammock Split Leg

The RM0701 In Chair Hammock with split legs is a fully supportive sling that is manufactured from 3D Spacer fabric.

The Spacer fabric is used to replace traditional padding for additional comfort by reducing heat by allowing air to circulate.

This sling is used in situations where the sling cannot be easily removed and therefor may need to stay in place for longer periods and the pommel design is unsuitable. This sling is available with head support and extensor straps.

## SPECIAL SLINGS

Whilst Revived Medical are always looking to improve the standard range of products sometimes it is necessary to have something made to meet the user's needs over and above a standard product.

We can provide bespoke products.

- Dimension changes.
- Additional padding.
- Pressure relieving padding.
- Additional straps.
- Body belts.
- Copy of existing slings.

### Classic Hammock

The Classic Hammock is traditionally designed to offer maximum comfort and support by reducing hip movement.

The Classic Hammock is an alternative option over a full hammock or the RM0800 when used with amputee's.

Padded legs as standard and available with head support. Slide sheet material on legs to reduce friction and rear pocket for positioning of the sling when applying.

### RM0800 Comfort Deluxe

The RM0800 Comfort Deluxe is designed to give more comfort and support where needed over a Universal style. It has a different angled leg shape that fits around the hips reducing hip movement.

Other standard features are longer padded legs and slide sheet material on legs to reduce friction with a rear pocket for positioning the of the sling when applying.

### RM0900 Comfort Deluxe Head Support

The RM0900 Comfort Deluxe comes with a head support to offer more support for transfers from a lying or reclined position.

Other standard features are longer padded legs and slide sheet material on legs to reduce friction with a rear pocket for positioning the of the sling when applying.

*Solutions created from experience*

All Revived Medical slings are manufactured in house using high quality materials from UK suppliers.

Our staff have many years experience in this field of producing slings and moving and handling products and are very passionate taking pride in what they do.

Revived Medical UK Ltd

### **RM01000 Standard Standing**

The RM01000 is a standing sling for use with standaid hoists and is designed to assist the standing process.

The sling is fully padded with a Velcro body belt and non-slip mesh back panel. This sling is for use only with users who have weight bearing capabilities.

### **RM01100 Standard Seated**

The RM01100 Standard Seated sling is designed for seat to seat transfers using a standaid hoist.

This sling supports the user under the legs. The sling is fully padded with a Velcro body belt and non slip mesh back panel.

### **Bathing and Showring Slings**

The bathing and showering slings are manufactured from Mesh Polyester without padding for quick drying. Available in RM0300 / RM0400 / RM0600 and RM0800.

Revived Medical UK Ltd manufactures slings for use on many hoist manufacturers products.

The practice of mixing hoists and sling manufacturers is a historical practice. Revived Medical UK Ltd works to and within the requirements of the Medical Device Directive (MHRA). All our slings have been manufactured above the requirements of BS EN 10535:2021 and carry the UKCA mark.

Our slings have been tested by an independent Authority to satisfy dimension and stability during the laundry process. Our labelling is clear and precise and identifies all the key areas for the user.

Revived Medical UK Ltd carries Public and Products liability insurance to no less than £5m.
